

The PRO-CHECK 720

The leader in one person electrical and light diagnostics.

Presenting a quick, easy and reliable solution for your trailer light testing from LITE-CHECK - the leader in economical, technician-friendly test equipment. This unit automates your trailer light inspection with an electrical tester that increases the efficiency of your testing process which decreases your cost.

The PRO-CHECK 720 (powered by 12VDC) and PRO-CHECK 720AC (powered by 120VAC) directly identify electrical faults in your 12VDC 7-way round pin-equipped trailer via base unit control and full-function remote control. Our customers tell us this unit can reduce their troubleshooting time by 25%!

This one tool completely automates the process of checking electrical circuits in your trailer to give you peace-of-mind when returning equipment to service. More than an electrical tester, the PRO-CHECK 720/720AC reduces the process of testing trailer lights to the push of a button that stands above any other process of testing electrical circuits. When you need a light check, you need LITE-CHECK!

WORKS WITH STANDARD CONNECTIONS

ONE MAN OPERATION.

FULL FUNCTION REMOTE CONTROL

LITE-CHECK PRO-CHECK 720

HEAVY DUTY TRAILER ELECTRICAL TESTER

DESCRIPTION: The **PRO-CHECK 720** is an electronic diagnostic electrical tester for heavy duty trailers with the standard 12vdc 7-way round pin connectors.

The software automatically presents the circuit voltage, amperage, and condition on the easy-to-read digital screen. Circuit faults (open, short, open ground, chassis ground) are displayed along with a unique fault alarm. Software protects vehicle wiring with automatic shutdown with excessive amperage and low voltage.

The **full function remote control** has six circuit keys. The panel membrane switch has the six circuit switches plus an auto circuit test and circuit load test.

- 4 second auto circuit test for circuit conditions.
- Load test to add circuits for ABS blink code testing and total amp load.

PRO-CHECK 720 is available in two versions:

- 720DC requires 12vdc battery power or power supply (no battery charger)
- 720AC requires 110vac power

MOUNTING: hand truck with battery, wall mount with power supply, service truck with battery

ACCESSORIES:

- LITE-CHECK POWER SUPPLY 311R
- 8ft straight 7w cable or 20ft straight 7w cable

CONSTRUCTION:

- Steel enclosure with durable powder coat.
- High quality electronics and membrane switches.
- Made to high industrial standards in the USA for rugged use.
